# March 2020 – Technology Security Tip

Internet Security Awareness Course

With the spotlight always on cyber security, the diocese would like to make available an excellent security awareness training course from KnowBe4, a security awareness training company used by the diocesan offices. This online training is provided through the diocese at no cost to our parishes and schools.

The videos in this course show the dangers of the Internet and what you need to do to stay safe. Each section has a live demonstration showing how the "bag guys" take advantage of unsuspecting users and finishes with a "security check" quiz at the end.

This course would be ideal for parish and school employees to take, especially newly hired individuals. Keep in mind that the entire course is fairly long and does not "save your place" if you exit, but you can log back in and go directly to the section of your choice. The link to this course is https://www.knowbe4.com/homecourse
