# April 2022 – Technology Security Tips

<u>Battle of the Browsers</u>
Like a lot of folks in my day to day, I jump back and forth between using Google Chrome and Microsoft Edge. When a website won't load on one, it will usually load on the other. I have also found that some websites load faster and have a better user experience when using either Chrome or Edge. Click this link for an informative and fair comparison between the two most popular browsers on the market at this time.

<u>Cyber Security Questionnaire</u>
If you have not yet sent your parish or school's completed cyber liability questionnaire to Greg, please do so as soon as possible. It is important that we receive a response from every location, so we can make an honest assessment of where our diocese stands in terms of cyber security. Contact Greg with any questions.
