

June 2022 – Technology Security Tips

Cloud Storage Alternatives

Cloud storage is a great choice for data safekeeping for nearly any sized business. Cloud backups are backed up to multiple servers so you never have to worry about losing your digital information. Storing data locally in one place can be very risky. Risks include hardware failure and cyber-attacks. Click [here](#) to take a look at a good guide from cnet.com that compares the best cloud options for 2022.
