

July 2021 – Technology Security Tip

Employee Cyber Security “Must Knows”

With many businesses and parishes opening back up and getting back to “normal”, you may find your employees need a refresher on what to watch out for in the cyber threat world. The bad guys have not taken a year off and we must do all we can to protect our sensitive electronic data. Click [here](#) for a short list of what we all can do to make it a little tougher for the criminals to gain a foothold into our environment.
