

August 2022 – Technology Security Tip

Hardware Roundup

I thought I would take a break from cyber-security tips and dive into some IT hardware for a change. Laptop computers have never been so affordable and powerful. Laptops can be a great alternative to bulky desktop computers. They are portable and if set up correctly, can replace the big boxes sitting on or under a lot of desks. However, unlike desktops, they are more prone to being stolen, so properly encrypting them is important. Click [here](#) to see the best budget laptops for 2022.
